## **TARGET** Training Augmented Reality Generalised Environment Toolkit

### **PROJECT PROGRESS AT MONTH 6 (OCTOBER 2015)**

The second TARGET General Assembly took place in Hampshire, UK at Technical Coordinator VCL's premises from 30<sup>th</sup> September – 2<sup>nd</sup> October 2015. Workshops enabled key working sessions for all partners related to specifications and platform end user requirements, technical implementation, and dissemination activities planned and ongoing throughout the first period of the project.

*THE TARGET PARTNERS IN HAMPSHIRE*

The first major set of deliverables related to training scenarios, technical requirements and ethics were submitted at the end of October 2015. Public versions can be found on the TARGET public website ([link below](#)).

User site visits to each of the 8 TARGET end user partner organisations began in July 2015 and will continue through the month of November. The site visits enable those involved in Work Package 1 "User Perspective, Trials, Assessment and Best Practices" to obtain user requirements for the TARGET platform, training scenario development and trials, and allows the technical team to observe human factors during training exercises. This is to ensure user focussed development of the TARGET platform and technical feasibility of the requirement.
